DERWENT PROFESSIONAL QUALITY

For leisure artists, art students over 16, and professional artists

Consumer research clearly demonstrates that professional artists seek out the very best quality products to support their art practice. Derwent can justifiably claim to produce the most innovative and largest range of artists pencils, pens and accessories, ideal for the professional artist. Packaging and communications for the Derwent Professional range are appropriately confident and understated, leaving prospective consumers in no doubt if they are looking for professional quality art supplies to support their artistic ambitions.

DERWENT ACADEMY

For aspiring artists for school age artists, 14+ years old and entry level adult hobbyists

Derwent Academy supports school-age artists and entry level adult hobbyists on their artistic journey. The high quality product, packaging and communications reflect the changing aspirations of this audience; presenting a high quality, appealing proposition supporting consumers in reaching their goals.

DERWENT LAKELAND

For creative children for junior artists, age 4-10 years old

This is where the artistic journey begins for our very youngest artists, using colour pencils for the sheer joy of creating something, enabling them to begin to express themselves through art.

This entry-level category retains the legacy name of Lakeland to offer loyal customers the continuation of a familiar brand. The chosen colours, fonts and imagery also work together to clarify the intended audience.

DERWENT HERITAGE

With heritage dating back to 1832, Derwent's innovation comes from a deep understanding of the needs and requirements of artists. Perfecting the art of pencil manufacturing in the Lake District for generations, our wide range of pencils is synonymous with quality and craftsmanship. Artistry is threaded through the core of every Derwent product to deliver world class artists' materials at every stage of the creative journey.

Elegant design and premium metal finish with a concealed push button eraser	
Available in blisters	

Ultra fine sketching with a high quality metal barrel.

Derwent Precision mechanical pencils have a premium full metal body, perfect for maintaining grip and balance. Ideal for sketching and drawing, the 0.5mm and 0.7mm sets contain 1 mechanical pencil, a refill pack of 15 HB leads and 3 replacement erasers. The graphite leads have a strong point for extended use and minimal breaking. Up to five leads can be placed into the pencil barrel at one time. The smooth laydown of graphite makes the pencil perfect for fine detail and cross-hatching techniques. Refillable leads and erasers are available separately.

IVOR HARRISON

Derwent are renowned worldwide for manufacturing some of the finest graphite pencils artists can use. It goes without saying that the graphite cores and replacement cores of the Precision are of a high standard graphite that we have all come to know and love. With Derwent graphite, you know you're going to get reliability and quality in every pencil.

The metallic body of the Derwent Precision sports a stylish black gloss finish, trimmed with chrome nib, lapel clip and end cap, making the entire body an aesthetic beauty for anyone to carry.

Perhaps the most important feature of the Precision is the metal retractable sheath that extends with the click of the end cap, revealing the graphite. It's an important feature because so many mechanical pencils in this price range have static sheaths for the graphite. These tend to either break or rip clothing if the pencil is placed in a pocket. With the Derwent Precision, everything is tucked away beautifully when not in use meaning you can return to your pencil time and time again.

All I can say is thank you, Derwent, you have done it again, a wonderful product for artists, students, business person about the city or academics, the Derwent Precision fits them all.

ADELE WAGSTAFF

The Derwent Precision mechanical pencil is a very enjoyable drawing tool to use. When held in the hand it has a good weight and feels beautifully balanced when sketching. I found it incredibly responsive, giving delicate marks with the lightest of touches. When further definition was needed it created expressive, rhythmic flowing lines alongside fine dark lines. The fine lead was easy to load and its narrow point allowed for amazing precision when doing highly detailed work. It also enabled wonderful contrasts of light and dark, alongside both soft-edged and sharper-edged lines. I highly recommend this mechanical pencil as a drawing tool. It is ideal for students and professionals who are exploring expressive linear drawing, as well as those who work on very detailed pieces.

Derwent Precision is perfect to use for the subject of anatomical drawing because of its precise nature; expressive linear strokes and flowing marks needed to pick out structures and shapes.

STEPHEN LILLY

To get the feel of my new acquisition, I took some scrap paper and just scribbled and doodled for a while. Upon application I found the leads to be nice and strong, taking a fair amount of pressure and punishment. They also delivered a nice even application; some brands I have used in the past contain 'hard' particles that scratch the paper surface.

With a very pleasing weight and feel, the Derwent Precision cuts a very sleek and ergonomically designed figure, whilst giving artists the versatility they require.

As I usually work with a 0.5mm lead I was a little apprehensive having to use a slightly thicker lead. I need not have worried as it handled beautifully and was easy to sharpen to the finest of points for even more detail where required. The Precision was a joy to work with!

Unique blend of charcoal with colour.

Charcoal's black, right? Wrong! Meet Derwent Tinted Charcoal – charcoal with just a hint of colour. These pencils give you all the good points of charcoal pencils; they can be smudged and blended easily, you have great control and there's less mess, plus you get colour with a beautiful element of charcoal 'blackness'! 24 tints to add a little colour to your life!

CAROLE GORDON

Tinted Charcoal is a great addition to the Derwent range of charcoal. The dark subtle colours can be extended with the use of white into a lovely range of muted tones. The pencils can be sharpened for detailed work and smudged and blended for a lovely range of effects. They can give crisp sharp lines or soft aspects to your drawing.

Fine grade charcoal in a pencil - clean to hold and use.

Often used for life studies, charcoal can be considered very traditional. However encasing it in wood, you'll have something much more contemporary - Derwent Charcoal pencils. They will give you great control over your drawings but keep all those traditional charcoal effects that you love, with less mess.

DERWENT CHARCOAL SET

RANGE FEATURES

1 Dark Charcoal Pencil for intense lines
2 Tinted Charcoal Pencils in Glowing Embers and White for some natural colour and highlights
2 Sticks of fine 4mm Natural Vine Charcoal for organic mark marking
1 Stick of 18mm Natural Chunky Willow Charcoal to make broad expressive strokes
1 Paper Stump for effective blending

Mixed charcoal media.

Perfect for life studies and expressive pieces; this charcoal collection has been specially selected to include a comprehensive range of charcoal media.

DERWENT GRAPHIC

High quality traditional graphite pencils, from 9B to 9H.

Derwent Graphic pencils contain the finest graphite to create a smooth and graduated line, strong to the core. Highly lightfast, they have a soft laydown of colour that removes easily with an eraser or putty rubber. Derwent Graphic has one of the largest choice of graphite shades available in the market with 20 consistent degrees from 9B to 9H. Ideal for expressive sketches and portraiture or detailed illustrations.

ALEXIS MARCOU

Derwent Graphic were the first set of professional quality pencils I discovered at the age of 12. I remember liking the way they felt in my hand and started to wonder what a set of pencils like this could be capable of. It was during this time I decided to draw what was to become my first detailed drawing. The different depths and shades offered by these pencils gives you an incredible versatility to create what non-artists would call the impossible. Graphic pencils make blending easy, detail stand out and shading and depth incredible. No matter what style of art you choose, these pencils will ensure your vision comes to life.

Essential graphite shades for sketching.

Sketching is all about being loose, free and easy, and Derwent Sketching pencils couldn't be easier to use; just 3 simple degrees HB, 2B and 4B, to cover all your sketching needs. They have a wide strip so you can quickly rough-out a loose sketch, or capture a passing cloud before it disappears! Once you've done that you can sharpen your pencil to a fine point to add the all-important detail.

Dramatically dark graphite, even darker than a 9B.

Derwent Onyx is our blackest graphite pencil; even darker than a 9B. Great on its own, or add to work using other graphite media, like Graphic or Sketching pencils, to add dense shape and tone. Easy to build up darker shade by increasing pressure, and apply fine detail with a hard sharp point.

JUDITH SELCUK

Onyx pencils are the perfect balance of dark, strong graphite that enables me to achieve stunning deep shades whilst being able to sharpen to precision; particularly useful for detailed drawing when you need the extra depth. They compliment my graphite pencils perfectly and can also be used to add even more depth to my Graphitint drawings and sketches. A staple item for all art kits.

Pure compressed graphite sticks for quick coverage.

Amazing! No wood casing just pure water-soluble graphite in a stick! There are so many things you can do with Derwent Water-soluble Graphitone; you can use it like a pencil but the real fun begins when you peel off the wrapper! Use the stick whole or break it into chunks to create broad sweeps of tone quickly, then just add water and watch the graphite dissolve into softness! You can choose from 4 wash strengths; from light to a very dark wash.

DERWENT

GRAPHITINT

WATERCOLOUR PENCILS

Unique blend of water-soluble graphite with a hint of colour for dramatic tonal work.

Graphite and colour combine to create this unique formulation of watercolour pencil pigments and graphite. This range is ideal for mixed media work. When used dry, Graphitint provides just a hint of colour but adding water transforms the tint into rich, shimmering shades with an underlying, graphite sheen. Muted colour palette offers warm and cool tones.

JAKE SPICER

Graphitint's muted colours make it perfect for my drawings, from autumnal landscapes to portraits, in a palette of warm and cool tones. With a smoother, waxier feel than a conventional graphite pencil and a dash of subtle colour, Derwent Graphitint are my go-to sketching pencil, with a water brush kept on hand to help dissolve the Graphitint into washes.

DERWENT LIGHTFAST

JESSE LANE

These lightfast pencils are Derwent's first oil-based pencils. The firmness of the lead is a good balance between soft and hard. It can make a fine point without breaking immediately, while still maintaining a bit of the smoothness of a creamy, soft pencil. The pencils themselves have a classy appearance with a varnished, bare wood. The neutral tone allows the coloured ends to stand out, making it easier to quickly locate colours while working. What I love about the Lightfast colour selection: there are colours that are almost, but not quite, black. I find this super helpful when creating subjects fading in and out of shadow. I also enjoy the mid-tone colours for skin-tones.

Superior, 100% lightfast pencils – won't fade for up to 100 years.

Derwent Lightfast Pencils have been formulated to be 100% lightfast. The revolutionary core is resistant to prolonged colour change ensuring artwork will not fade for 100 years under museum conditions. Tested under the harshest conditions to internationally recognised standards, this premium range of oil-based pencils offers an incredible range of colours not seen in other lightfast collections.

LF - Lightfastness rating

Lightfastness refers to the chemical stability of a pigment under long exposure to light. Made from the finest raw materials and the purest pigments, all colours comply with internationally recognised lightfast testing standard ASTM D6901. A scale of 1 - 5 is obtained with values 1 and 2 considered to be highly lightfast. Colours will not fade at these values for up to 100 years under museum conditions.

Achieve fine detail and a smooth and even laydown with one special pencil.

Derwent Procolour pencils are the perfect combination of a strong point and a smooth, effortless laydown, delivering beautiful, effortless blendability. Wax formulation glides like an oil while delivering incredible covering power. These pencils have a strong core which retains a sharp point for fine detail while minimal chipping and dusting keeps work clean and smudge-free. Reproduction print colours are true to the original binders, meaning there is no scan glare when creating professional copies of your work.

JAKE SPICER

We all develop our own favourite colours in a range and repeatedly sharpening some pencils to stumps whilst others remain untouched. I'm going to predict that it won't be long until I'll need to return to shop for these four again...

Blue – not my usual pick of a favourite colour, the name is as delightful as the colour itself; a saturated mid-tone green-blue.

Nutmeg – it's rare to see such a rich, dark red-brown. It reminds me of dark autumn leaves after rain.

Geranium Lake – not so pale as other pinks it is still a little way away from being a brash bright red and gives rosy life to flesh tones.

Storm Grey – I love a good grey and I've been using this warm, near-neutral mid-tone for everything – even on its own as a graphite substitute.

Velvety finish and natural colour range - ideal for nature drawings.

Derwent Drawing pencils are highly lightfast and have a unique creamy texture which produces a soft velvety finish. Drawing pencils are a versatile drawing tool with an extra thick core and high pigmentation, creating a dense colour application. These wax-based pencils work beautifully with both dry and water-soluble mediums. Available in a range of 24 lightfast colours in natural, sepia and muted tones.

DAVID BREMMELD

This range of pencils is unique - they have qualities not found in other colour pencils. I love the strong pigmentation giving great covering power, but at the same time allowing many layers to show through. I have adapted my technique to get the best out of these pencils, and to fully exploit their superb qualities. I like using them with Derwent Graphite pencils to create bold landscapes. I found them very robust in use, allowing me to make expressive marks and gestures.

Shimmering metallic colour, outstanding on black paper

Derwent Metallic pencils are shimmering, highly metallic pencils that blend beautifully together to create vivid and striking metallic effects, particularly on dark paper. With a new intense metallic formulation that heightens the appearance of the colour, the shimmering pigments and strong core produce brilliant definition and rich colour application. Suitable for a wide range of fine art and craft projects. Available in an extended range of 20 metallic colours, including eight new colours.

JUDITH SELCUK

ARTIST
RECOMMENDED

As a pencil artist, I love the control the pencil can give, combining this with the beautiful metallic pigment takes my creativity to the next level. Metallic pencils allow me to easily create dynamic effects on black and toned paper which is something that can be difficult to achieve with regular pencils. Colours pop in this contemporary modern range with shades of gold and silver that you don't find anywhere else. Metallic pencils work equally well with the other pencil ranges, especially for highlights that shine and add dimension. A must-have for any creative pencil artist.

Firm point and extensive colour range for detailed light layering.

Derwent Artists pencils have been the choice of professional artists since 1938. They have a highly pigmented core which creates a smooth and rich colour laydown. The larger core is ideal for creating broad, expressive strokes, while the strong point can sustain layering and blending techniques. Artists pencils are ideal for a wide range of drawing styles; from bold landscapes through to more detailed illustrations, and are available in an extensive range of 78 colours.

MALCOLM CUDMORE RECOMMENDED ARTIST

I build up tone and colour with a lot of cross-hatching and like to work on fairly smooth surfaces. I like the individual colours and marks that I use to be evident in the finished work and, with these pencils, I feel I have a great deal of control over how much colour is put down at any time. Derwent Artists pencils are perfect for me - the range of colours is superb, the barrels are a good size and very comfortable for sustained use - especially as my work can take some time to complete!

Vibrant blendable colour with a smooth laydown.

Derwent Chromaflow pencils are highly pigmented for striking work, these pencils have a vibrancy to the colours, so will stand out well when used on black and mid tone paper. Chromaflow is also erasable so it is possible to create highlights in work. Premium core strength pencils that handle pressure when sharpening and in use. Enjoy consistent, reliable quality, every time.

KINSEY LANE

These pencils are so smooth and creamy and blend together with ease. The consistency allows me to softly build up color and also allows me to add pressure to burnish without scoring into my paper. My work focuses around vibrant colors and Chromaflow has an excellent color palette with a good balance of vibrant colors and neutral tones. The pigments of these pencils are very saturated. Chromaflow has the softness to create the initial foundation blending in a piece and the durability to create fine finishing details. In the past I have used two separate pencil lines to accomplish these two tasks, but now I am glad there is one pencil that can do both!

JAKE SPICER ARTIST RECOMMENDED

The Inktense XL blocks feels like the natural evolution of the Inktense range, adding a new dimension of scale to the preceding pencils, blocks and pan sets. Used dry, the size of the XL blocks encourages expansive and playful markmaking but it is in combination with water that I've most enjoyed using them. Laying colour down on the page dry and liquefying the marks, drawing onto wet paper with the end of the block or painting from the blocks as if it were a giant watercolour pan all elicit different effects. Combining the XL blocks with the other media in the Inktense range opens up a whole new world of colour!

Watersoluble, vibrant colours that dry permanently for exceptional layering. Draw, paint, cut or grate in xl format for broad coverage.

Derwent Inktense XL Blocks feature a versatile, watersoluble ink like formulation with vivid, richly coloured pigments that intensify when activated with water, offering significantly more vibrant washes than traditional watercolour paint. Each block contains a high volume of formula, equivalent to 8 pencils, that dries permanently allowing you to layer without dissolving previous applications.

The strength and body of these chunky blocks make them highly versatile, suitable for all sizes of artwork, especially for broad coverage on large scale art pieces. Use them whole for broad strokes and expressive markings or break them into pieces and grate into powder for textures

and detail. Used dry the block have a smooth texture and can be used for techniques such as blending, layering and hatching. Watercolour techniques include, wet on wet, wet on dry, dry on wet, splattering, spraying and mixing.

Create bold and agile marks on a variety of surfaces, tried and tested to be effective on paper, fabric, ceramics, wood and other porous materials for a wide range of fine art and craft projects. Will stay in place on fabrics when hand washed in cool water (below 30 degrees) with no harsh detergents.

Permanent when dry - doesn't wash out like watercolour. Layer up intense vibrant colours.

Derwent Inktense Blocks are intensely vibrant, watersoluble blocks that have been formulated to dry permanently, offering exceptional layering capability without dissolving previously dried layers of vivid colour. Just like the pencils, colours are highly-pigmented and can be used dry, or mixed with water which is when the colour becomes even more intense. The colours retain vibrancy after drying, creating ink-like effects. Once dry the colour is permanent and you can work over the top of it. Derwent Inktense is highly versatile and can be applied to many porous surfaces including ceramic, wood and fabric. Suitable for use on paper and fabrics (ideal on silk and cotton) for a wide range of fine art and craft projects.

ROBERT DUTTON

If you want to put some colour into your creativity, there is no better way than to start with Derwent Inktense blocks. The portable, easy to use, extensive colour range of Inktense, that creates such glorious intense colours in your paintings and drawings, is second to none. This exciting media has changed the way I work in so many positive ways and I'm sure Inktense will do the same for you too.

Specially formulated blend of soft charcoal tinted with colour in xl format for broad coverage, bold marks, agile lines and smooth smudging.

Derwent Advanced Performance Charcoal tinted with colour, for a variety of earthy shades, including purple and green charcoal. The large, naturally watersoluble and highly versatile block is soft in texture delivering smooth smudge effects that can be manipulated over a large surface area. Each chunky block has a large volume of formula in it, equivalent to 8 pencils, and has been designed with the strength and body to fit comfortably in the hand, giving optimum control. Achieve broad strokes and expressive marks when using the blocks whole or break into pieces and grate into powder for textures and detail. Used dry the blocks have a smooth texture and can be used for techniques such as blending, mixing, and smudging.

Specially formulated watersoluble blend of smooth graphite tinted with colour in xl format for broad coverage, bold marks, agile lines and powder textures.

Derwent Advanced Performance Graphitint is specially formulated graphite tinted with colour, for wet and dry use. The unique formulation combines graphite and vibrant pigments to create rich, yet muted shades of watercolour blocks, with each block features a large volume of formula, equivalent to eight pencils. With the size and structure designed to fit comfortably in hand for optimum control, the highly versatile, large, block can be used for agile, expressive mark making on all sizes of artwork. Use whole for bold strokes and broad coverage or break into pieces or grate into a powder for detail and textures. Used dry, the smooth texture of the Graphite delivers consistent laydown and used wet, the colours can remain rich or be watered down. Once dry they have a matte appearance.

JAKE SPICER

It was through Graphitint pencils that I was first introduced to Derwent materials so it is exciting to see the versatility of that water-soluble, erasable range translated into such a unique new form. The blocks are durable and long lasting, and I've never had so much fun experimenting with a medium as I have had with the XL Graphite blocks. My work is typically tightly representational so the expressive breadth of the XL blocks has helped me to break out of established habits to extended the range of my visual vocabulary.

JAKE SPICER

Teaching figure drawing classes I have always found students are afraid to pick up XL blocks at first, opting for the familiarity of pencil or charcoal, but what a transformation when they finally pluck up the courage to give the XL blocks a go! The scale of the medium unlocks a whole new range of marks, allowing students to use their whole elbow, wrist and shoulder in their mark making. The blocks combine well with regular willow and vine charcoal, while their size, colour and square profile have added a new dimension of possibility to my materials box.

Smooth Graphite in a range of degrees from Hard to Onyx dark in XL format for broad coverage, bold marks, agile lines and powder textures.

Derwent Graphite XL Blocks in a range of degrees, from Hard to Very Soft and Onyx Dark, with a smooth texture that delivers a consistent laydown. With a size and shape that has been designed to fit comfortably in the hand the blocks are highly versatile and can be used for expressive mark making. Break into pieces or grate into a powder for detail and textures or use the block whole for broad strokes and bold, agile marks, ideal for all size artwork, especially for coverage on large scale art pieces. Each block contains a high volume of formula, equivalent to eight pencils. Grate for techniques such as mixing, splattering, and painting.

Natural Graphite in block form.

Natural graphite was first discovered in the Lake District and now it's your chance to discover Derwent Natural Graphite blocks! They're brilliant for creating big dramatic pictures whether you use them flat or on their edge. Blending them couldn't be easier, use either your fingers or a paper stump if you prefer. You've got three grades to choose from: soft, medium or hard and, if that wasn't enough, they're naturally water-soluble too!

IAN HODGSON

Incredibly versatile, XL Blocks are capable of creating a wide range of textures and effects, from subtle blending, sensitive work through expressive mark marking to the densest of tones and shading. These blocks respond beautifully to working with the graphite with an eraser. An absolute pleasure to use, the chunky graphite blocks have opened up exciting new possibilities from my art practice and I can't get enough of them!

JAKE SPICER

I'm a fan of all forms of charcoal and the XL Charcoal blocks have been adding a new dimension to my tonal toolkit. I've been using them alongside charcoal pencils and I love how easily they can be grated for their powder or used on their side as a substantial block, while the range of values in the 6-block have made it easier to control the tonal range of my drawings. Their size and square profile open up a range of marks that can be harder to access with slimmer sticks of charcoal and I've been surprised by the variety of fine marks that they can make when used edge-or, or when they are used in combination with an eraser.

Soft Charcoal in a variety of greyscale shades in XL format for broad coverage, bold marks, agile lines and smooth smudging.

Derwent Charcoal XL Blocks in a range of greyscale shades, from Light to Ultra Dark and Blue Black. The large, naturally watersoluble and highly versatile block is soft in texture and delivers smooth smudge effects for expressive mark making. Each chunky block has a large volume of formula in it, equivalent to 8 pencils, and has been designed with the strength and body to fit comfortably in the hand, giving optimum control. Break into pieces, or grate into a powder for detail and textures or use the block whole for whole for broad strokes and coverage. Used dry the blocks have a smooth texture and can be used for techniques such as blending, mixing, and smudging.

Permanent when dry - doesn't wash out like watercolour. Layer up intense vibrant colours.

Derwent Inktense paints are intensely vibrant, water-soluble pencils that have been formulated to dry permanently. This paint range offers exceptional layering capability without dissolving previously dried layers of vivid colour, unlike traditional watercolour. Just like the pencils, colours are highly-pigmented and can be used dry, or mixed with water which is when the colour becomes even more intense. The colours retain vibrancy after drying, creating ink-like effects. Once dry the colour is permanent and you can work over the top of it. Derwent Inktense is highly versatile and can be applied to many porous surfaces including ceramic, wood and fabric. Suitable for use on paper and fabrics (ideal on silk and cotton) for a wide range of fine art and craft projects. This paint set is ideal for travel and use outdoors with everything needed to 'paint on the go.' Includes 12 highly lightfast Inktense paint pans, a mini waterbrush, a sponge and five mixing palettes.

2302636

2305789

ROBERT DUTTON ARTIST RECOMMENDED

This ingenious compact paint box is great for outdoor and small studio work. It contains 12 water-soluble Inktense paint pans in a lightweight, well-made plastic paint box and Derwent's popular water reservoir brush. Colours are quickly activated, hold well on a loaded watercolour brush, and are easy to mix because of their great pigmentation. I particularly liked the way the colours glaze one over the other easily and wet layers stay put when you work one over the other. As a result, cleaner glazing techniques are achieved throughout the Inktense range.

Unique blend of water-soluble graphite with a hint of colour for dramatic tonal work.

Derwent Graphitint Paint Pans contain a unique blend of graphite with a hint of colour to create subtle muted colour with a graphite sheen. This range is ideal for mixed media work. Muted coloured paint pans consist of warm and cool tones delivering fine graphite particles that settle into the paper grain to create a myriad of effects. Apply on cold pressed watercolour paper to bring out pools of granulations and passages of tone and colour. The subtle and naturally muted colour palette is ideal for urban and natural landscapes when used with Derwent Lines Makers, or expressive art. Contains 12 Graphitint paint pans, a mini waterbrush, a sponge and five mixing palettes.

BEE MORRISON

Rich powerful pigments in this new compact box offer a full spectrum of beautiful earthy English colours that mirror elements in the landscape such as 'slate green' and autumnal 'russet'. I love the plum shades of 'port' and 'juniper' and the moody depth of 'dark indigo' that suits my style of painting. Do some new colour mixing trials and experiment with them for a completely new look to your flower and portrait painting. Try them on wet watercolour paper and you will, like me, fall in love with the fabulous graphite granulation.

Water-soluble, unique blend of charcoal with hints of colour.

Enjoy the inimitable quality of charcoal art with a twist. Derwent's uniquely formulated tinted charcoal paints are water-soluble. Adding just a hint of colour to the charcoal base, this palette of 12 deep, muted tones provides a high level of creative control with a white pan for highlighting. Each colour quickly and easily mixes, creating atmospheric and expressive results, with a matte, textured finish. Blend colours wet, apply in layers and lift, smudge or draw over when dry. This compact, self-contained set contains 12 tinted charcoal paint pans, five mixing palettes and a sponge to clean the mini waterbrush included.

ROBERT DUTTON

Derwent have done it again - created another fantastic and versatile art medium! In the past the only available charcoal for artists to use to express their ideas was black. Not anymore! The twelve subtle water-soluble Tinted Charcoal colours are unique in tone, colour and consistency. Presented in a handy pan set, each colour quickly and easily mixes so you can create all sorts of expressive, moody and dramatic subjects, quickly, at different sizes in a really engaging and fluid way. I personally love the way each subtle colour has a unique, natural granular texture to them when dry, creating expressive landscapes and seascapes. The paint pans last a long time and gorgeous tints and further colours are created when the rich, lightfast pigments are colour washed over one another. Once dry they can be drawn over and combined with other Derwent mediums in all sorts of exciting new ways, or easily lifted/manipulated when dry. A really exciting medium and one I welcome into my studio to be used time and time again, either on its own or with other drawing and painting mediums. What a great set to elevate my work on an altogether new level!

DERWENT METALLIC PAINT

Shimmering metallic coloured paint, outstanding on light and dark paper.

Striking on both black and white surfaces, the Derwent Metallic Paint Pan Set includes 12 unique shades that mix beautifully to create a full spectrum of metallic colour. Extra fine metallic pigments give a reflective glint, maintaining their shimmer once dry. Apply in creamy opaque strokes, to layer and blend on the page. Suitable for a range of fine art or craft projects. Contains 12 Metallic paint pans, a mini waterbrush, a sponge and five mixing palettes.

2305657

CLAIRE MILLS

This beautiful palette of metallic pan paints offers a whole world of possibilities, from creating large washes of watercolour with soft shimmer to layers of paint with an opaque metallic shine. The shades mix to create a range of colours, enabling me to use them in isolation as well as in mixed media pieces. On white paper they offer my work a flash of colour and subtle shine, on black surfaces the metallics pop to create drama and contrast. Traditional watercolour techniques work well with this modern range to create fresh effects and sparkling highlights. An exciting new addition for both amateur and professional artists.

Soft, refreshing coloured paints in pastel shades. Apply as a light wash or layer up for a brighter finish.

Soft, refreshing opaque coloured paints in pastel shades. Derwent's uniquely formulated pastel shades paints are soft and playful. These colours layer up in thick, opaque layers allowing the colour to dry as a bright, matte finish adding dimension to illustrations. Alternatively, these dreamy, contemporary shades can be applied in light washes for a pretty and light finish with a slight opacity to it or used with our Inktense and Metallic paint sets to create dramatic effects.

ABBY NURRE

Pastels — we see these tranquil tints in the wings of flamingos, scoops of sorbet, and sunset skies, and the Derwent Pastel Paint Set clearly connects with these images. As a watercolour artist, I enjoy capturing such lovely scenes and sweet indulgences, but my palette often feels limited when it comes to pastel shades. This set provides the perfect combination of soft, calm hues with a versatile, vibrant saturation. Derwent paints are opaque once dry, allowing for a user-friendly layering process that adds dimension to illustrations. This compact palette is easily transportable and complements other Derwent palettes including Inktense and Metallics. The shades bring new light to watercolour illustrations and will enhance the artwork of any artist.

DERWENT LINE AND WASH PAINT PAN SET

Vibrant ink-tense and muted colour paints to wash over permanent linework. Perfect for on location art.

This compact, curated collection contains versatile greys and blacks along with highly pigmented colours including six of Derwent's most loved Ink-tense colours. These paints can be dissolved for subtle washes or unlike traditional watercolour, washes of vivid Ink-tense paint can be applied without dissolving previously dried layers. Four Graphitint colours provide muted tones and the set is completed with two neutral lighter shades. The black Line Maker pens featuring the finest quality 0.3mm and 0.8mm Japanese nibs, are perfect for versatile linework.

JEDIDIAH DORE ARTIST RECOMMENDED

I'm honoured to have been given the opportunity to experiment with the exciting new Derwent Line and Wash Paint Pan Set. For several weeks of drawing on site, in the studio, and even on the streets of NYC, I have been loving how wonderful this set is; it's the perfect size for on the go art. When I first opened the set, I was immediately drawn to the beautiful family of colours and tones. Natural colours are a perfect palette for urban drawing and painting on location. Colours like Mango, Poppy Red, Port, Payne's Grey, and Meadow are just some of my favourites that I normally have to mix primary colours in other paint sets to create. The unique arrangement of colours mix together effectively when painting and look elegant and refined. The colours capture the essence of urban landscapes, dynamic NYC settings and even natural scenes. I'm so happy with what I have been able to illustrate in both my location drawing and reportage art with this set. The Line and Wash Paint Pan Set is the set I've been waiting for!

DERWENT

SHADE AND TONE MIXED MEDIA SET

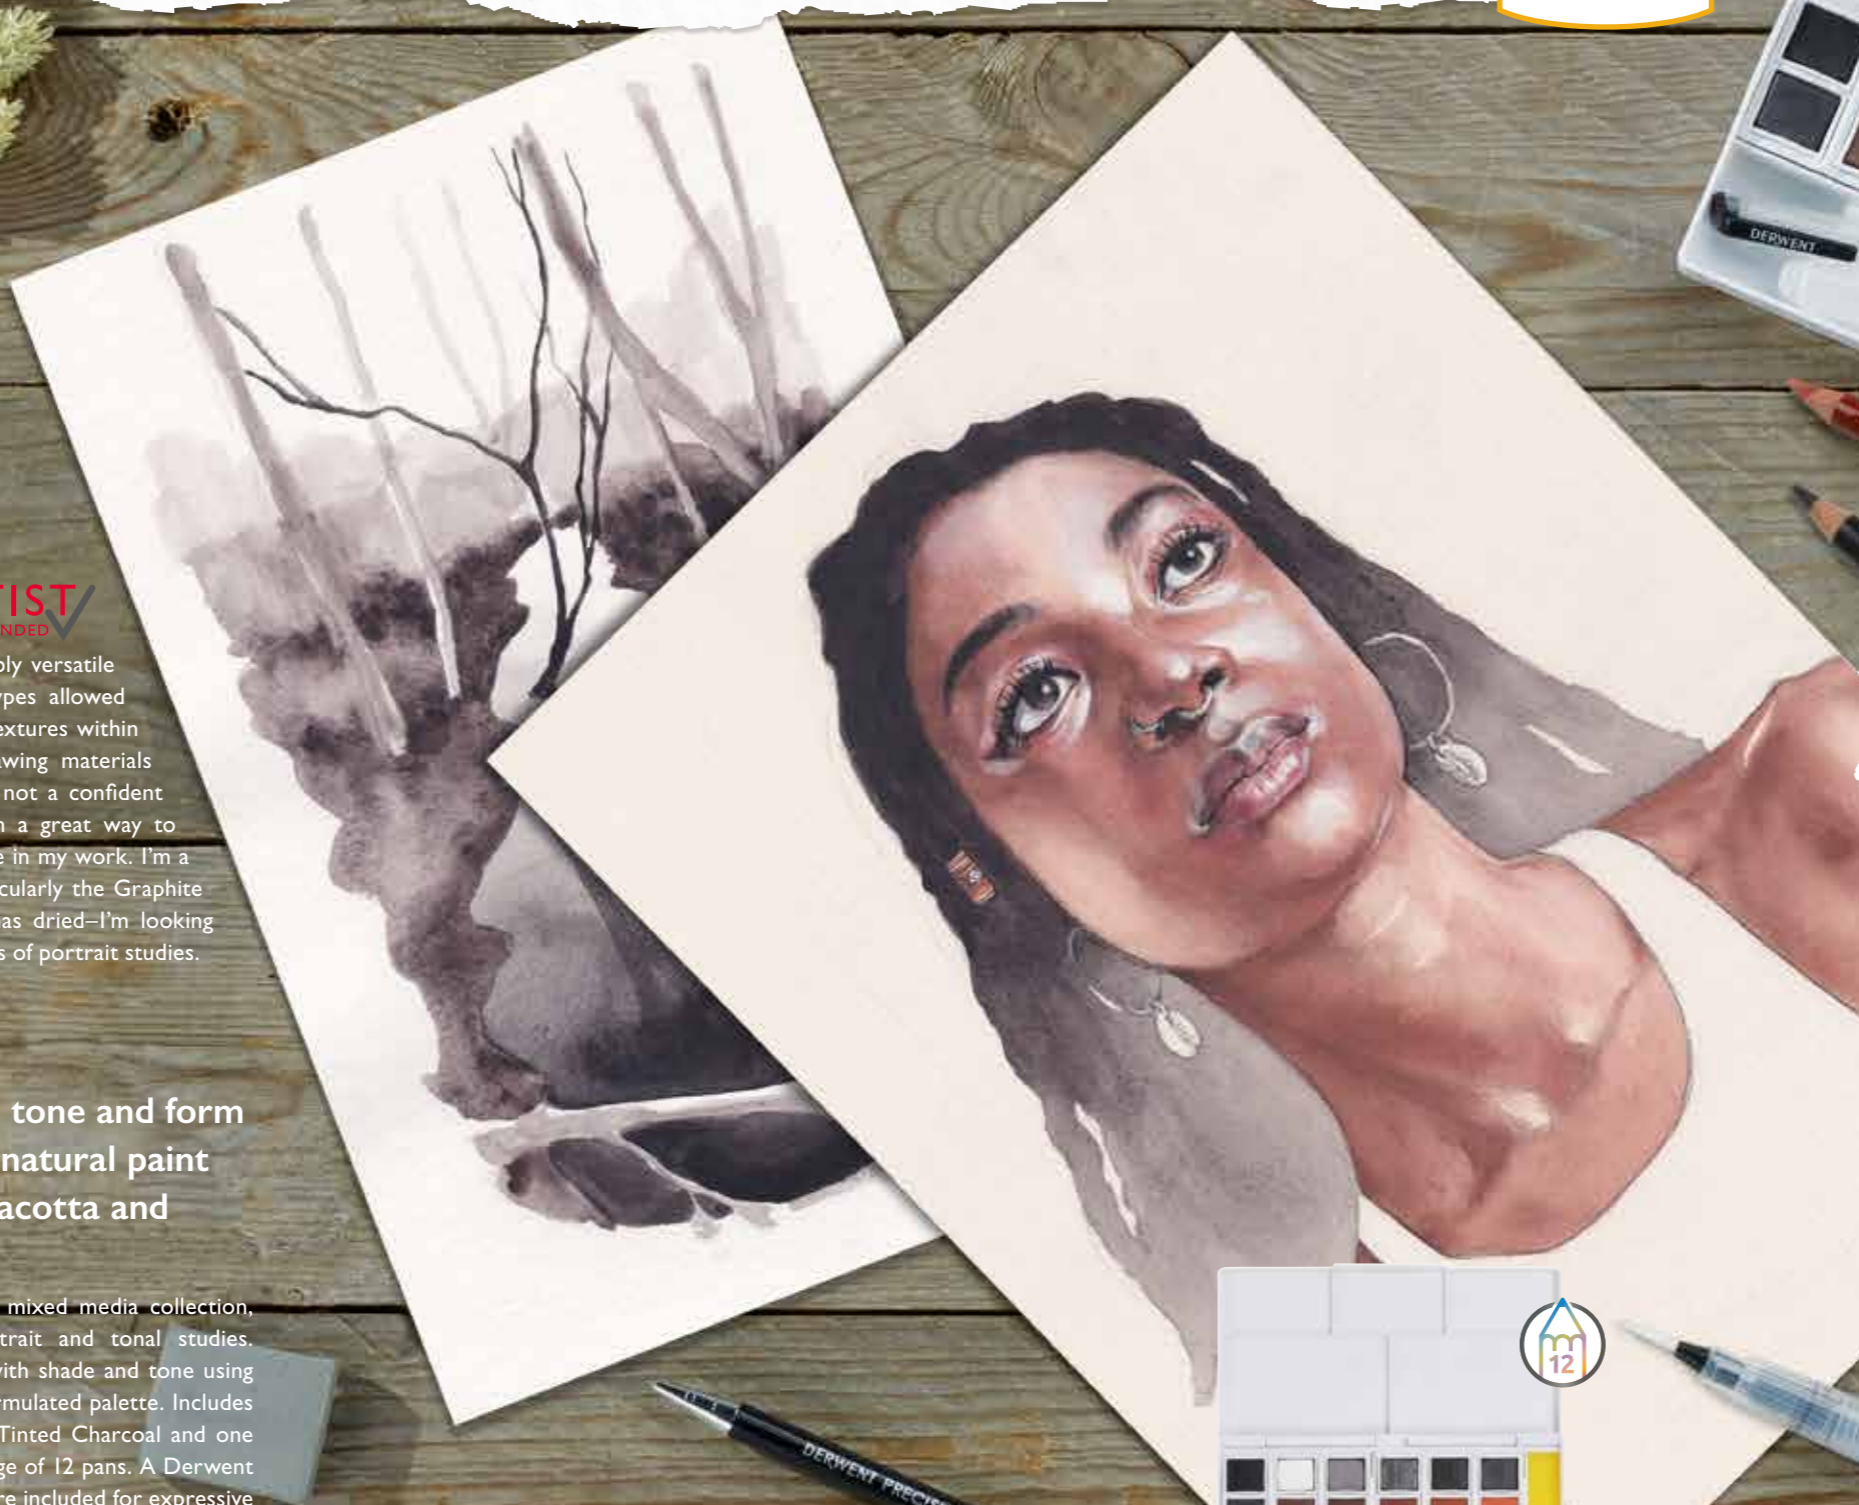

JAKE SPICER **ARTIST** RECOMMENDED

The Shade and Tone set is an incredibly versatile set – the variety of different pan types allowed me to create a really wide range of textures within a muted colour palette and the drawing materials in the set complement the pans. I'm not a confident watercolourist, so this has also been a great way to start to use water-soluble media more in my work. I'm a particular fan of Graphitint pans particularly the Graphite Grey, which can be erased once it has dried—I'm looking forward to using the set in a new series of portrait studies.

Experiment with shade, tone and form with this curated set of natural paint colours with black, terracotta and graphite pencils.

A curated, natural and monochrome mixed media collection, perfect for creating landscape, portrait and tonal studies. Everything you need to experiment with shade and tone using Derwent's brand new and uniquely formulated palette. Includes seven Inkense, two Graphitint, two Tinted Charcoal and one Pastel colour, resulting in a muted range of 12 pans. A Derwent Drawing, Onyx and Graphic B pencil are included for expressive sketching and form drawing. This compact set also includes a mini waterbrush, five mixing palettes and a sponge to clean your waterbrush.

Free flowing, permanent, fineline pens made with the finest Japanese, break resistant nibs.

Derwent Line Makers are free-flowing fine liners that deliver consistent, smooth, opaque lines. Ideal for both drawing and writing, they contain permanent, fast drying pigment ink, with intense colour which dries quickly and will not move once dry. Ideal for a variety of mixed media techniques, water-soluble media such as Derwent InkTense can be layered over the top without affecting lines already on the page. Engineered using the highest quality Japanese, break resistant nibs, ranging in size from a super-fine 0.05 to a bold 0.8 (black only).

DERWENT PAINT PEN

Permanent, highly lightfast and versatile, opaque paint pens.

Derwent Paint Pens are a creative drawing and painting tool that contains pigmented acrylic paint that is highly lightfast and permanent once dry. The high-quality, break resistant 0.5 Japanese nibs are very durable and allow for a variety of unique paint effects from fine lines to large layers and exciting, imaginative paint splatters. Derwent Paint Pens are suitable for use on fabric, glass and wood.

CARNE GRIFFITHS

I have been using the Derwent Paint Pens for years now, for me they are a perfect accompaniment to my work, being fluid and free when I need them to be - I can use them to create watercolour effects - bold splashes of colour and subtle blends. Then when I need control and detail the fine nib provides control for adding fine details like floral shapes and crosshatching. Having a pen that is water soluble when wet and then permanent when dry is perfect for creating layered work with expressive marks and then increasing detail as I work. The pens work brilliantly alongside and over other media such as watercolour, acrylics and spray paints.

DERWENT PREMIUM PAPER

INKTENSE PAPER

Exceptional watercolour paper maximises colour vibrancy and withstands multiple techniques of Derwent Inktense. Derwent Inktense paper optimises the premium performance of the Derwent Inktense range including pencils, blocks and paint.

- 2305834 Inktense Paper Pad (7" x 10")
- 2305835 Inktense Paper Pad (9" x 12")
- 2305836 Inktense Paper Pad (12" x 16")

The cold press manufacturing process creates a lightly textured surface, perfect for enhanced control in watercolour techniques. The robust and absorbent surface can withstand multiple layers of Inktense without tearing fibres, creating vibrant permanent colours when dry.

Cold press - textured surface

LIGHTFAST PAPER

Exceptional archival paper maximises performance of Derwent 100% Lightfast pencils. Derwent Lightfast paper optimises the premium performance of the Derwent Lightfast pencil range. The hot press manufacturing process creates a smooth surface;

- 2305831 Lightfast Paper Pad (7" x 10")
- 2305832 Lightfast Paper Pad (9" x 12")
- 2305833 Lightfast Paper Pad (12" x 16")

suitable for the unique blending properties of oil-based Lightfast pencils. Extremely robust paper, with strong 100% cotton fibres and 300gsm weight, is ideal for multiple layering. Naturally acid free, artwork won't fade for up to 100 years when used with Derwent Lightfast pencils.

Hot press - smooth surface

12 SHEETS OF 300GSM, FINE GRAIN PAPER LONG LASTING AND ACID FREE

5 ASSORTED COLOURS
12 SHEETS OF 120GSM, FINE GRAIN PAPER GOOD PIGMENT UPTAKE AND LAYDOWN ACID FREE

BLACK MIXED MEDIA PAPER

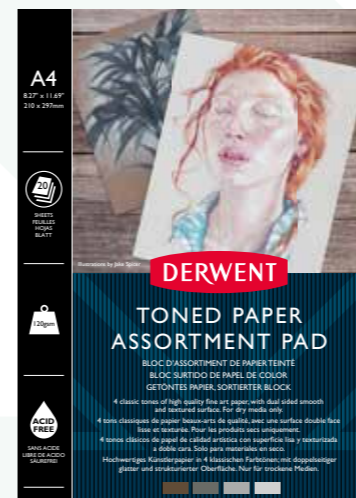

Derwent A4 Black Mixed Media Paper comprises 12 sheets of heavy weight 300gsm, fine grain, acid-free paper that is suitable for use with both wet and dry art media.

The robust composition of the paper can withstand multi-media use, and multi layering techniques without compromise to the paper structure.

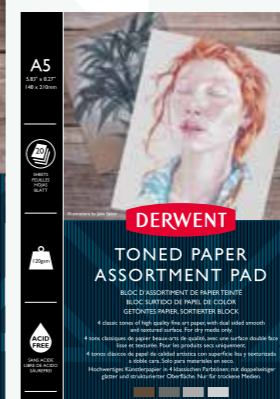

The paper's rich depth of colour provides the perfect partner to our Derwent Metallics collection, that offer highly reflective, opaque colour. Together, they demonstrate exceptional performance, whilst instantly enhancing creations with a contrasting, dramatic black backdrop.

TONED PAPER ASSORTMENT PAD

The Derwent Mixed Toned Paper pads contain 20 sheets of 120gsm acid free paper in four mid tone colours. Comprising of Greys, and earthy shades the Derwent mixed toned paper provides an excellent background for sketching and drawing which can be used to build up darker shadows and dramatic highlights. Each sheet is double sided, with one side smooth and the other textured, making it perfect for use for dry media including pencil, pastel and charcoal. Ideal for an array of art techniques including, art journaling, life drawing and portraiture. Available in A4 and A5 sizes.

WATERCOLOUR PADS

Developed for water-soluble pencils, this smooth paper is perfect for all water-soluble media including Derwent Inktense pencils and blocks and Derwent Watercolour pencils. Unlike other watercolour paper, the smooth surface provides an excellent base for detailed watercolours and dry pencil work. The range features stitched binding and 12 sheets of 300gsm (140lbs) acid free paper. Available in A2, A3, A4 and A5 sizes.

		A2 Landscape 2301972

ACCESSORIES

DERWENT SHARPENERS

A wide variety of sharpening products; specifically designed with the artist in mind.

1. SUPER POINT MANUAL HELICAL SHARPENERS

Designed to sharpen pencils to the optimum super fine point. Extendable front plate features self feeding mechanism which stops when a superb point has been achieved and no further sharpening is required. For pencils up to 8mm in diameter. Includes sliding tray reservoir and desk clamp. Available individually, box packed.

2302001 Super Point Manual Helical Sharpener
2302000 Super Point Mini Manual Helical Sharpener

* Large (9-12mm)/Small (6-8mm)

2. BATTERY OPERATED TWIN HOLE SHARPENER

Compact battery operated sharpener suitable for both large and small diameter pencils*. Durable blades can withstand hours of sharpening and shavings are neatly caught in a transparent reservoir. Includes broken tip remover. Requires 4 x AA batteries (not supplied). Available individually, box packed.

2302332 Battery Operated Twin Hole Sharpener
2302353 Replacement Sharpener

3. MANUAL TWIN HOLE SHARPENER

Derwent Twin Hole Tub Pencil Sharpener, featuring a dual size metal sharpener with high quality blades, that are long lasting to create a consistently smooth and sharp point. With hole sizes of 11.5mm and 8.25mm for optimum compatibility with most artist pencils.

2306123 Manual Twin Hole Sharpener

4. PASTEL AND CHARCOAL SHARPENER

Specifically designed for use with the more fragile Derwent Pastel pencil and Derwent Charcoal pencil mediums. Also suitable for sharpening other large diameter pencils such as Derwent Drawing and Artists pencils. Available in CTU trade packs of 14.

0700234 Pastel and Charcoal Sharpener

5. METAL PENCIL SHARPENER

Designed to fit all Derwent ranges. Sharpens pencils to a fine point. Available in CTU trade packs of 20.

0700233 Metal Pencil Sharpener

- 2305823 Push Button Waterbrush Medium Tip Blister
- 2305822 Push Button Waterbrush Large Tip Blister
- 2305824 Push Button Waterbrush Large Chisel Tip Blister

WATERBRUSHES

Portable, leak proof and easy to clean. Each features a non-drip valve for easy to control water flow. Fine, Medium and Chisel tip heads are easily distinguished by number so you can grab the one you need. Available individually and in hanging bags of three.

- 2301975 Waterbrush 3 Pack
- 2300123 Small Waterbrush
- 2301760 Medium Waterbrush
- 2301974 Chisel Tip Waterbrush

BLENDER AND BURNISHER

BLENDER

A soft colourless pencil that allows you to blend two or more colours together to create a new colour. At the same time it physically mixes and smoothes the pigments so individual strokes and hard edges are softened. Available individually, in blister pack of four, and tub packs.

BURNISHER

A hard colourless pencil which when used over layers of pigment provides a rich polished finish. Available individually, in blister pack of four, and tub packs.

2301756 Blender Pencil

2301757 Burnisher Pencil

2301774 Blender & Burnisher Blister 4 Pack

BLENDER PEN

Designed for use with wax-based pencils, the blender pen allows the artist to blend away pencil lines, creating smooth and even colour. Effective with both colour and graphite pencils. Available in twin pack of two nib sizes; 2mm and 4mm.

2302177 2 Blender Pens

PAPER STUMPS

Made from compressed rice paper and with a point at each end, paper stumps make blending charcoal and pastel much easier. Once the stump gets dirty and the point wears down they can be easily cleaned and re-pointed using a sandpaper block. Available individually in medium-size and in blister packs of 3; small, medium and large (ranging from 5.5mm diameter to 10.5mm).

0700230 Paper Stump Medium

2300561 Paper Stumps Blister 3 Pack

SCALE DIVIDER

Ingenious drawing tool designed to transfer measurements from life to paper; ensuring accurate proportions every time. Scale pictures in ratios from 4:1 to 1:4. Folds neatly away and will slip easily into a backpack for easy travel. Available individually in blister pack.

2300580 Scale Divider

PENCIL EXTENDER

Designed to prolong the life of your pencil. Available in blister pack of two sizes; small for standard size pencil barrels, and large for pencils such as Derwent InkTense and Artists.

2300124 Pencil Extender

SPRITZER

Adds a new creative dimension to water-based projects. Spray water directly over water-soluble drawings to create interesting textures, colour runs and dribble effects. Dissolve colour pigment and fill the Spritzer to spray straight onto an image. Available individually in blister pack.

2300592 Spritzer

ACADEMY

DERWENT ACADEMY	118
ACADEMY SKETCHING	120
ACADEMY COLOUR PENCILS	122
ACADEMY PAINTS	124
ACADEMY MARKERS/PASTELS	126
ACADEMY GIFTING	130

Derwent Academy has been created for aspiring artists wishing to develop and improve their skills. Judith Selcuk takes us through her key recommendations from the Academy range, and how to get the most from the variety of media on offer. An award-winning professional freelance illustrator and artist, Judith trained at Falmouth School of Arts in Graphic Design and has since gone on to pursue a career in art and design. As an artist and demonstrator she can be seen all over the country at art fairs, major art stores and events and trade shows. Judith has published several books internationally on her art techniques and holds regular lessons and workshops in the UK, primarily from her studio in Worcestershire.

ACADEMY SKETCHING PENCILS

Sketching pencils come in a range of hard to soft graphite. The higher the H numbers the harder the graphite, and the lighter tone it will create. B pencils are softer and make darker, richer tones. Use a variety of tones in your drawing to create depth and dimension. Blend soft areas by scribbling a B grade pencil on scrap paper and rub with cotton wool. Then transfer to your drawing for soft areas of shading such as shadows and clouds. Remove highlights with an eraser and blend smaller defined areas with a paper stump. Avoid smudging with your hand by placing a spare sheet of paper underneath.

ACADEMY WATERCOLOUR PENCILS

Clean and portable, watercolour pencils make the perfect tool for college, home and outdoor use without the need for water pots or mess. Washes are easily achieved by lightly shading the paper and using a water brush over the top to turn the pencil into watercolour. For layers of colour allow each previous layer to dry before adding the next. Interesting effects can be achieved by drawing into a wet paper surface or previous wash with a dry pencil, as well as wetting the pencil tip with water and 'painting' with the pigment in the core of the pencil. Watercolour pencils prefer a cartridge paper or a hot press watercolour paper with just enough texture to grip the pigment without becoming too textured to allow smooth shading and details.

ACADEMY METALLIC MARKERS

Perfect for lettering and illustration, these highly metallic markers work equally well on black paper as well as white, preferring a smoother surface to create clean lines and blends. Allow sections to dry to prevent smudging and colour transfer. This also enables layering with their opaque quality ink. Each metallic colour is very different and the firm nib holds its shape well. Always replace the cap on the pen when not drawing with it, even for brief periods to prevent any ink drying on the nib. Store pens horizontally when not in use to prevent the nib drying out or the pigment settling at the bottom of the pen.

ACADEMY ACRYLIC PAINTS

Acrylic paints are incredibly versatile and can be used in thin washes or in thick impasto layers. Acrylics work best on canvas or acrylic paper with a texture. For best results use two different pots of water, one for washing your brushes and one for mixing colours and washes. You can control the amount of water you use by wiping any excess off on kitchen roll. That way colours and your thickness of paint will stay consistent. Try painting a wash of acrylic first to cover the white of the canvas then built up depth and texture once dry. You can use a variety of interesting objects to create marks and patterns such as pen or bottle tops.

ACADEMY OIL PASTELS

Create exciting marks and textures with oil pastels. Try layering oil pastels and scraping back off with a sharp craft knife or scalpel. You can then add more oil pastel and repeat countless times. Choose a paper with a light texture to grip the oil pastel as it will not adhere well to a smooth surface. Oil pastels are full of lovely bright pigments so do not erase. Avoid smudging by putting a piece of tracing paper under the hand you draw with. Store safely with a sheet of glassine paper on top.

ACADEMY SOFT PASTELS

Soft pastels are perfect for layering and building up depth and tone, and also for a variety of mark making techniques. To release maximum pigment scrape the harder exterior off and release the beautiful pigment within. Soft pastels work best on a textured paper to grip the pastel, and look fantastic on a coloured pastel paper! They can be erased to create detail and textures and used on their side for block shading areas quickly. Blend with paper stumps to avoid skin oils being transferred to your paper. Store horizontally if possible with a sheet of tracing or glassine paper over the top.

ACADEMY ACRYLIC PAINTS

Derwent Academy acrylic paints are fast drying compared to oil paints. A formulation that retains tinting strength, colour vibrancy and consistency whether used alone or mixed with other painting mediums.

2302401

RANGE FEATURES

12, 12ml tubes of acrylic paint
Made from rich pigments and a formulation that retains tinting strength, colour vibrancy and consistency whether used alone or mixed with other painting mediums
Use straight from the tube or dilute with water or a painting medium to achieve lighter wash effects

ACADEMY OIL PAINTS

Derwent Academy oil paints, while slow to dry, are one of the most versatile forms of painting. Place selected oil colours onto your palette or apply directly to your surface. Remember to always put the cap back on your oil tubes!

2302406

RANGE FEATURES

12, 12ml tubes of oil paint
Made from rich pigments and a formulation that retains vibrancy whether used alone or mixed with other painting mediums
Long drying time allows for colours to be blended over a long period

Explore our range of Academy painting sets in oil, acrylic and watercolour. Made from rich pigments and formulations which retain colour vibrancy.

ACADEMY WATERCOLOUR PAINTS

Derwent Academy watercolours are available in a convenient pan set or tubes of paint. Great for creating brilliant washes of even transparent colour.

2302404

RANGE FEATURES

12, 12ml tubes of watercolours
Made from rich pigments and a formulation that is easy to use
Use straight from the tube or dilute with water to achieve various effects

ACADEMY WATERCOLOUR PAN SET

2301955

RANGE FEATURES

12 full-size pans of paint
Includes a paintbrush
3 section lid for easy mixing

ACADEMY MARKERS

ACADEMY PASTELS

ACADEMY TWIN-TIP MARKERS

RANGE FEATURES

- 8 vibrant colours
- The brush tip creates both thick and thin lines with one stroke
- The fine tip has a broad edge and fine point for maximum control

MERCHANDISING SOLUTIONS

MERCHANDISING	136
POINT OF DISPLAY UNITS	138

FREE STANDING UNITS (FSUS)

A modern modular merchandising solution to show Derwent as a stand out premium brand in retail stores.

Easily adaptable to suit different stock and store environments, the system allows easy category navigation for consumers and an engaging experience at the shelf edge.

Merchandise the FSU using a range of shelves, hooks and point of display (POD) options to showcase a selection of tins, blisters and loose stock.

The Derwent FSU is packed in three clearly marked outer boxes for transit and features standard British AC power plugs. Please source suitable electrical adapters for your region.

POINT OF DISPLAY UNITS (PODS)

All PODs can be fixed to our FSU using the pegboard attachments included (also available separately), or used as stand-alone counter displays.

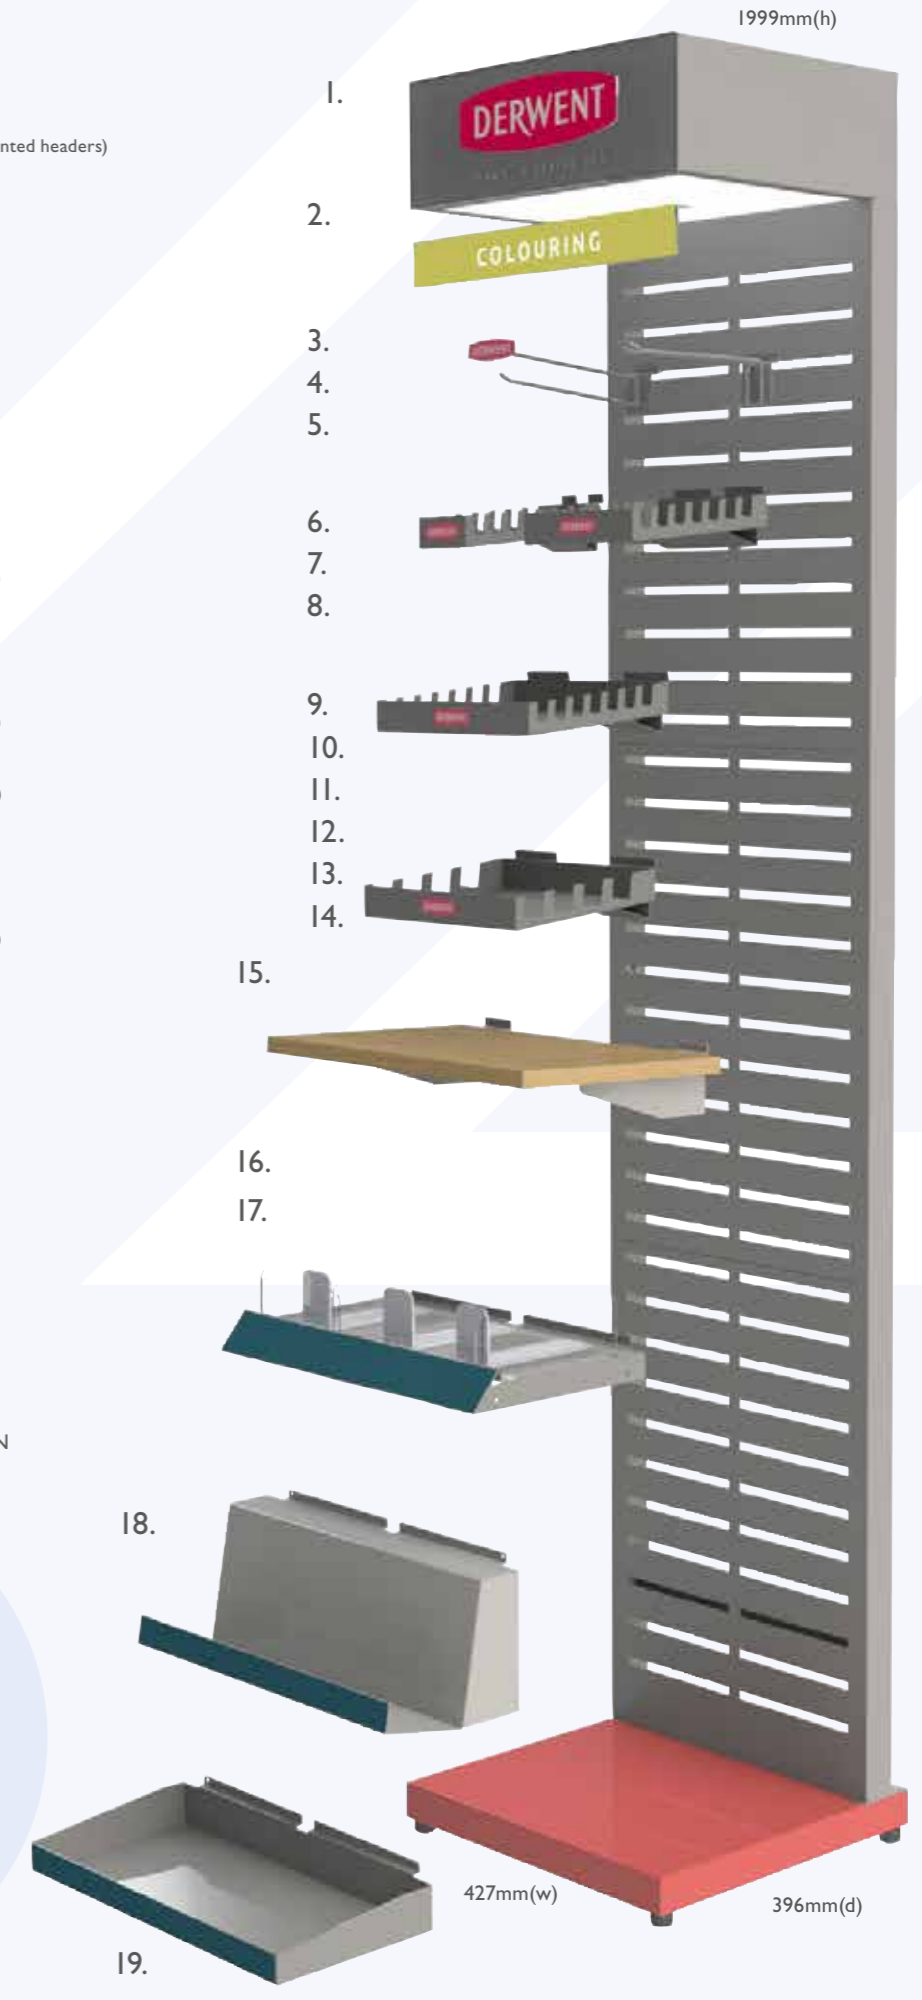

Product information panels provide detail of product features and benefits of each range. Test and try pads are also positioned on each display (refills available separately 2302759).
